Email ID: lucas.gabule@gmail.com

Contact no.: +639269422209

Linkedin Profile: [John](#)

Profile

Total experience: 6 Years 6 months

Previous Job Title: Senior Full-Stack Developer

Time in Previous Role: 1 year 1 month

Visa/Work permit: N/A

Validity Date of Visa/Work Permit: N/A

Willing to relocate: No (Foreign Country)

Willing to travel: Yes

Results-driven Senior Full-Stack Developer with over 6+ years of experienced leading the design, development, and deployment of complex web and mobile applications. Proven expertise in managing development teams, architecting scalable systems, and delivering high-quality solutions in agile environments. Skilled in React.js, Angular.js, Next.js and Laravel, Node.js, with a focus on performance optimization, code quality, and user-centric designs. Passionate about driving innovation and mentoring teams to achieve technical excellence.

Skills

Technical Skills

	Primary Skills	Secondary Skills
Programming Languages:	JavaScript (ES6+), TypeScript, PHP	Python, Java, .Net
Front-End:	React.js, Angular, Next.js	ShadCN, Tailwind CSS, Bootstrap, Vue.js
Back-End:	NestJS/Node.js, Laravel	FastAPI, CodeIgniter, Yii2
Databases:	MySQL, PostgreSQL	MongoDB, Redis, MSSQL
Cloud & DevOps:	Google Cloud Platform, Azure Devops	AWS (EC2, S3, Lambda), Docker
Testing & Tools:	Git, Gitlab, Jira, Trello	Jest, Mocha, Cypress
Architecture:	Microservices, Serverless	RESTful APIs, GraphQL, Event-Driven Systems
Machine Learning/AI	Langchain, Hugging Face, PyTorch,	
Libraries & Frameworks	CUDA	

Certifications (Professional Activities, Certifications, and Training Attended)

- Responsive Web Design (FreeBootCamp) – 2021
- Front End Development Libraries (FreeBootCamp) – 2021
- Back End Development And APIs (FreeBootCamp) – 2021
- Quality Assurance (FreeBootCamp) – 2021
- JavaScript Algorithms and Data Structures (FreeBootCamp) – 2021
- Fullstack Laravel API Development with Nuxt and Linux (FreeBootCamp) – 2020

Professional Work Experience

Health Advanced Institution (Freelance)

Dates 02/2024- 03/2025

Role: Senior Full Stack Developer

Responsibilities

- Designed and implemented RESTful APIs to manage user authentication, data processing, and third-party integrations..
- Led the development of a large-scale SaaS platform using Angular.js for a dynamic front end, paired with CodeIgniter and Redis for a robust back end.
- Optimized PostgreSQL database queries and indexing, reducing query times by 40%.
- Integrated Redis for caching high-traffic data, improving application response times by 30%.
- Worked with DevOps to deploy the application on Azure, ensuring scalability and high availability.

Key Projects and Deliverables

Office Of Health Standards Compliance (OHSC):

- **Project Objective:**
 - To promote and protect the health and safety of the users of health services.
 - To ensure quality and safety in healthcare by promoting and protecting the health and safety of users (patients) of healthcare services by monitoring and enforcing compliance of health establishments with the norms and standards prescribed by the national health system and ensuring that complaints of non-compliance with prescribed norms and standards are considered, investigated, and disposed of in a procedurally fair, economical, and expeditious manner.
- **Technologies Used:** AngularJS, Typescript, Javascript, PHP, CodeIgniter, Ionic, NodeJS, Azure Devops
- **Deliverables:**
 - Build beautiful analytic dashboard for monitoring purposes.
 - Designed and implemented an intuitive UI using angularjs and typescript resulting in a 20% increase in user engagement.
 - Designed and implemented RESTful APIs to manage user authentication, data processing, and third-party integrations.
 - Optimized MySQL database queries and indexing, reducing query times by 40%.
 - Integrated Redis for caching high-traffic data, improving application response times by 30%.
 - Worked with DevOps to deploy the application on Azure Devops, ensuring scalability and high availability.
- **Delivery Approach:** Azure Kanban | **Team Size:** 10 | **Location:** Remote

Internship and Community Services Programme (ICSP):

- **Project Objective:** Helps health professionals fulfill their statutory obligations for medical internships and community service, improving healthcare access in under-served areas.
- **Technologies Used:** NextJS, Typescript, Javascript, Laravel, MySQL, React Query, Zustand, Azure Devops
- **Deliverables:**
 - Developed custom admin panels with ReactJS for seamless content management.
 - Utilized NextJS for server-side rendering, enhancing SEO and reducing load times for content-heavy sites.
 - Managed MySQL database migrations and schema designs to ensure data integrity.
- **Delivery Approach:** Azure Kanban | **Team Size:** 10 | **Location:** Remote

DataBit Solutions Inc (Contract Part-time)

Dates: 02/2024 – 12/2024

Role: Senior Full Stack Developer

Responsibilities

- Design and implement responsive user interfaces using React.js, ensuring a smooth and engaging user experience.
- Develop and maintain the backend infrastructure using Python, with a focus on FastAPI for efficient and scalable solutions.
- Integrate frontend and backend components to create a cohesive and functional web application.
- Implement database solutions on Google Cloud Platform, ensuring efficient data storage and retrieval.

- Collaborate with DevOps and MLOps for seamless deployment and maintenance of the application on Google Cloud Provider.
- Create visually appealing and user-friendly designs in Figma, incorporating feedback from both technical and non-technical team members.
- Collaborate with founder to understand project requirements and translate them into technical specifications.
- Design and implement responsive user interfaces using React.js, ensuring a smooth and engaging user experience.
- Develop and maintain the backend infrastructure using Python, with a focus on FastAPI for efficient and scalable solutions. Integrate frontend and backend components to create a cohesive and functional web application.
- Implement database solutions on Google Cloud Platform, ensuring efficient data storage and retrieval.
- Collaborate with DevOps and MLOps for seamless deployment and maintenance of the application on Google Cloud
- Create visually appealing and user-friendly designs in Figma, incorporating feedback from both technical and non-technical team members.
- Collaborate with founder to understand project requirements and translate them into technical specifications.

Key Projects and Deliverables

Medtalkai:

- **Project Objective:** Web Application designed specifically for medical professionals. This application leverages state-of-the-art Large Language Models (LLMs) to provide accurate and efficient transcription services for medical audio recordings.
- **Technologies Used:** PostgreSQL, FastAPI, ReactJS, Firebase, Google Cloud Platform (GCP), Python, CUDA, NVIDIA cuDNN, GitHub, TypeScript, Docker, Bootstrap (Framework)
- **Deliverables:**
 - Built and maintained back-end services with FastAPI, enabling seamless API integration with LLMs for real-time transcription processing.
 - Deployed and optimized the application on Google Cloud Platform (GCP), ensuring scalability and reliability for production use.
 - Leveraged Python for scripting, data preprocessing, and integration of AI models into the application.
 - Enhanced LLM performance using CUDA and NVIDIA cuDNN for GPU acceleration, improving transcription speed and efficiency.
 - Implemented Docker for containerization, ensuring consistent environments across development, testing, and deployment stages.
- **Delivery Approach:** Jira | **Team Size:** 5 | **Location:** Remote

Rincon Forms:

- **Project Objective:** Designed and developed Rincon Form, a dynamic form management application similar to Microsoft Forms, allowing admins to create customizable forms and patients to complete them based on assigned tasks.
- **Technologies Used:** ReactJS, PrimeReact, TypeScript, NodeJS, TypeORM, PostgreSQL, Supertest
- **Deliverables:**
 - Managed PostgreSQL databases to securely store and retrieve transcription data, maintaining data integrity and compliance with medical standards.
 - Collaborated with team members via GitHub for version control, code reviews, and streamlined development processes.
 - Designed and implemented an intuitive front-end interface using ReactJS and Bootstrap, enhancing user experience for medical professionals.
 - Managed contributors, reviewing pull requests and maintaining code quality.
 - Learned best practices in code structure and testing from senior developers.
- **Delivery Approach:** Jira | **Team Size:** 1 | **Location:** Remote

Digital Awesome Inc (Contract)

Dates: 09/2023 – 12/2023

Role: Full Stack Developer

Responsibilities

- **Developing and Implementing Solutions:** Creating innovative applications and features that drive business growth and efficiency.

- Problem-Solving: Analyzing business needs and translating them into technical solutions, effectively solving critical business problems.
- Collaborative Work: Working closely with cross-functional teams to ensure seamless integration and alignment of digital strategies with business goals.
- Continuous Learning and Improvement: Staying abreast of the latest industry trends and technologies to continuously enhance our digital offerings and processes.

Technologies Used: PostgreSQL · Git · Tailwind CSS · Redux Toolkit · API Integration · NextJS · Kanban · ReactJS · Laravel, Jira

Delivery Approach: Slack | **Team Size:** 20 | **Location:** Remote

NXTWork (Contract)

Dates: 09/2022 – 03/2023

Role: Full Stack Developer

Responsibilities

- Developing and Implementing Solutions: Creating innovative applications and features that drive business growth and efficiency.
- Problem-Solving: Analyzing business needs and translating them into technical solutions, effectively solving critical business problems.
- Collaborative Work: Working closely with cross-functional teams to ensure seamless integration and alignment of digital strategies with business goals.
- Continuous Learning and Improvement: Staying abreast of the latest industry trends and technologies to continuously enhance our digital offerings and processes.

Technologies Used: React.js · TypeScript · Git · JavaScript · Problem Solving · Yii Framework · jQuery · Kanban · Laravel · MySQL

Delivery Approach: Slack | **Team Size:** 5 | **Location:** Remote

Business Marketing Engine (Contract)

Dates: 09/2022 – 03/2023

Role: Application Developer

Responsibilities

- Design, develop, and maintain robust and scalable web applications utilizing technologies such as Laravel (PHP), NodeJS, NextJS, and ReactJS. This includes architecting application flow, defining API integrations, and ensuring system stability and performance.
- Design, implement, and manage efficient database schemas (potentially relational and NoSQL like Redis). This involves writing and optimizing database queries, ensuring data integrity, and implementing data migration strategies.
- Develop user interfaces with a strong focus on accessibility (following WCAG guidelines) and responsiveness across various devices and screen sizes, ensuring a seamless user experience.
- Lead and mentor a small team of developers, fostering a collaborative environment, providing technical guidance, and promoting code quality and best practices.
- Manage and optimize application deployments on Digital Ocean, including configuring and utilizing S3 for storage solutions.
- Participate in technical discussions, evaluate new technologies, and drive continuous improvement initiatives within the development process and codebase.

Technologies Used: TypeScript · PostgreSQL · Git · Redux · Problem Solving · NextJS · Kanban · REST APIs · ReactJS · Laravel

Delivery Approach: Slack | **Team Size:** 5 | **Location:** Remote

Four13 Group (Contract)

Dates: 03/2021 – 07/2021

Role: Software Developer

Responsibility:

- Design, develop, and maintain robust and scalable web applications utilizing technologies such as NodeJS, NextJS, and ReactJS. This includes architecting application flow, defining API integrations, and ensuring system stability and performance.
- Design, implement, and manage efficient database schemas (MongoDB). This involves writing and optimizing database queries, ensuring data integrity, and implementing data migration strategies.
- Participate in technical discussions, evaluate new technologies, and drive continuous improvement initiatives within the development process and codebase.

Technologies Used: TypeScript · MongoDB · Git · Redux · ReactJS · Kanban · REST APIs · ReactJS · NodeJS

Delivery Approach: Microsoft Teams | **Team Size:** 15 | **Location:** Remote

Digital Creative (Contract)

Dates: 01/2021 – 04/2021

Role: Full Stack Developer

Responsibility:

- Design, develop, and deploy comprehensive e-commerce solutions leveraging Laravel for backend API development and ReactJS for dynamic and engaging user interfaces. This includes building features such as product catalogs, shopping carts, checkout processes, user authentication, and order management systems.
- Seamlessly integrate various third-party services critical for e-commerce functionality, such as payment gateways (e.g., Stripe, PayPal), shipping providers (e.g., FedEx, DHL), and other relevant APIs to enhance application capabilities.
- Implement and enforce coding standards, conduct thorough code reviews, and advocate for software development best practices to ensure maintainable, scalable, and high-quality code.
- Prioritize and implement robust security measures throughout the application, including protection against common web vulnerabilities (e.g., XSS, CSRF, SQL injection), secure handling of sensitive customer data, and compliance with relevant security standards.

Technologies Used: TypeScript · MySQL · Git · Redux · ReactJS · Kanban · REST APIs · ReactJS

Delivery Approach: Microsoft Teams | **Team Size:** 5 | **Location:** Remote

Vircreative Corp (Freelance)

Dates: 07/2019 – 12/2020

Role: Full Stack Developer

Responsibility:

- Architect, develop, and maintain a multi-faceted e-commerce platform using Laravel and ReactJS, tailored for a local farm market. This involves building distinct user interfaces and functionalities for customers, cashiers (potentially for in-person transactions), pickers managing orders, drivers handling deliveries, inventory management personnel, and administrators overseeing the entire system.
- Design and implement intricate workflows to support the various user roles, including order processing from customer purchase to driver delivery confirmation. This requires establishing robust role-based access control to ensure appropriate data visibility and actions for each user type.
- Integrate relevant third-party services to enhance local e-commerce operations, such as local payment gateways, mapping and delivery tracking services, and potentially SMS/notification providers for localized communication.
- Build and maintain an efficient inventory management system within the platform to track product availability, manage stock levels from local farms, and potentially handle perishability considerations.
- Adhere to and promote software development best practices throughout the development lifecycle. Implement comprehensive security measures to protect sensitive user data and ensure the integrity of transactions across all user roles within the platform.

Technologies Used: PostgreSQL · Git · API Intergration · Back-End Web Development · Server Programming · Problem Solving · Microsoft SQL Server · jQuery · NodeJS · HTML5 · Laravel · Transact-SQL (T-SQL) · CSS3 · AJAX, ReactJS
Delivery Approach: N/A | **Team Size:** 10 | **Location:** Local

Freelancing Journey (Freelance)

Dates: 07/2018 – 14/2019

Role: Full Stack Developer

Responsibility:

- Independently manage the complete lifecycle of web development projects, from initial client consultation and Photoshop-based design mockups to full-stack implementation using Laravel (PHP), ReactJS, jQuery (where appropriate for specific interactions), and NodeJS for potential backend services or tooling.
- This includes setting up and managing deployment pipelines on Digital Ocean using tools like VoltPanel (or similar) to deliver functional and visually appealing web applications tailored to individual client requirements..

Technologies Used: PostgreSQL · Git · API Intergration · Back-End Web Development · Server Programming · Problem Solving · Microsoft SQL Server · jQuery · NodeJS · HTML5 · Laravel · Transact-SQL (T-SQL) · CSS3 · AJAX, ReactJS
Delivery Approach: N/A | **Team Size:** 1 | **Location:** Remote

Education

ACLC College of Bukidnon

Phillipines

Bachelor of Science in Information Technology (2012-2016)

Leadership & Achievements

- Mentored and trained 3 junior developers, guiding them in full-stack development best practices and accelerating their onboarding process.
- Delivered a critical feature under a tight budget, ensuring cost-efficiency while meeting all client requirements, resulting in high client satisfaction and repeat business.
- Shared expertise as a part-time teacher, instructing students in software development concepts and fostering the next generation of tech talent.

Languages

- **English – Oral and Written Proficiency**
- **Tagalog – Oral and Written Proficiency**
